	HH-AS 20	HH-AS 40
Capacity Range (m <sup>3</sup> /h)	100	300
Ozone Amount (gr/m <sup>3</sup> h)	10	20
PPM	0,055	0,055
UV/C Capacity (Watt)	30	60
Power Consumption (W/h)	250	350
Device Dimensions (mm)	254 x 204 x 602	254 x 204 x 602

Elevators are compulsory use tools in which people get in close contact within high-rise buildings. No matter how often we ensure the hygenization of these tools, which have been speeding up our lives intensively for years, they turn into an active carrier for viruses and microbes due to their frequent use.

Thanks to the device we have produced to ensure continuous disinfection of such tools, elevators are disinfected with Ozone when there are no people inside.

Our devices have been tested and approved in **TUBIKAT and 9 Eylül University Environmental Microbiology Laboratories**.
